

TukaCAD is a free and open-source 2D CAD program with full parametric capabilities. TukaCAD has been in development since 2007. The latest version of TukaCAD is release 5.0 Beta 3, which you can download here [TukaCAD](#) no es un programa de funciones generales para construir todo cualquier cosa, pero si cuando necesita algo que se puede hacer con geometría plana simple y geometría paramétrica compleja. TukaCAD is not a general purpose program to build anything, but when you need something that can be done with simple geometry and complex parametric geometry. TukaCAD permite abrir y guardar archivos de dibujo en el estándar DXF, por lo que puede trabajar con otros programas de oficina y características relacionadas con el uso de CAD. The program can open and save drawing files in the standard DXF format so you can work with other office programs and CAD related features. TukaCAD ha sido desarrollado para realizar proyectos de construcción, desarrollando diseños de madera, plástico, metal y materiales no metálicos. TukaCAD has been developed to do construction design develop wooden, plastic and metal and non-metallic materials designs. Este programa está destinado a ser usado en un entorno de trabajo doméstico o comercial. It is intended to be used in a work environment on a computer desktop or office computer. Es un programa con licencia GPL2+. It is a GPL2. licensed software. TukaCAD es un proyecto de software libre, bajo la licencia GPL. It is free software under the GPL license. TukaCAD está disponible en el sitio web oficial en <http://www.tukacad.org/>, así como en los repositorios públicos de Debian y Fedora, y se puede descargar directamente desde este sitio web a través del link Downloads. TukaCAD is available from the official site at <http://www.tukacad.org/>, as well as from the public Fedora and Debian repositories, and it can be downloaded directly from this site at the link Downloads. TukaCAD 5.0 Beta 3 is a free software program for Windows that provides an easy to use, intuitive interface to CAD programs that support complex geometry including polygonal meshes, curves, splines and surfaces. It can be used to draw basic shapes such as arcs, circles and rectangles. TukaCAD supports Onshape Pro or Fusion 360 designs exported from other 2D CAD programs. The program uses a number of color schemes for rendering lines and objects based on their material type or color values coming from Solveig Materials Library add-on.
